

PETROLEUM

Managing Data in the Petroleum Industry

Big Picture™ for the Petroleum Industry

Newkota, a Bakken based oilfield service and rental company, utilizes the Big Picture Oilfield ERP software to streamline operations. Inventory, employee time approval, certifications, equipment, truck tracker, weekly reports and CRM for sales.

“Prior to our Big Picture deployment we were living in a spreadsheet world where nothing interacted. They came in and imported our spreadsheets and automated many processes. Now we are much more efficient, the database and mobile application have streamlined our internal operations dramatically.”
